INTERIOR PORTFOLIO

Virtual Reality for Real Estate

ENVIZION THE FUTURE.

SHAPING INSPIRING SPACES

The future begins with your vision. Through technology, any space can become the perfect expression of your aspirations. Explore the infinite possibilities of virtual design and turn imagination into reality.

Through virtual reality and innovative technologies, we provide developers with an essential tool: an accurate preview of the final project, which accelerates decision-making and creates strong emotional connections with future buyers.

A well-defined design not only attracts attention but also increases the perceived value of every project. We offer solutions that transform any space into a solid investment, with a real impact on the market.

3DVIZION JOURNEY.

10 years of experience

Founded in 2015, 3DVIZION has gained extensive experience in interior design, becoming a trusted partner for developers and real estate agencies. For a decade, we have transformed visions into tangible realities, combining technological expertise with creativity to deliver tailored solutions that meet the needs of the modern real estate market.

3 countries

With clients in France, the United Arab Emirates, and Romania, 3DVIZION has consistently expanded its network of collaborators, adapting to the specific requirements of each market. This diversity has allowed us to understand and implement the best international practices, becoming a global partner for real estate developers seeking innovative, high-quality solutions.

1478 projects

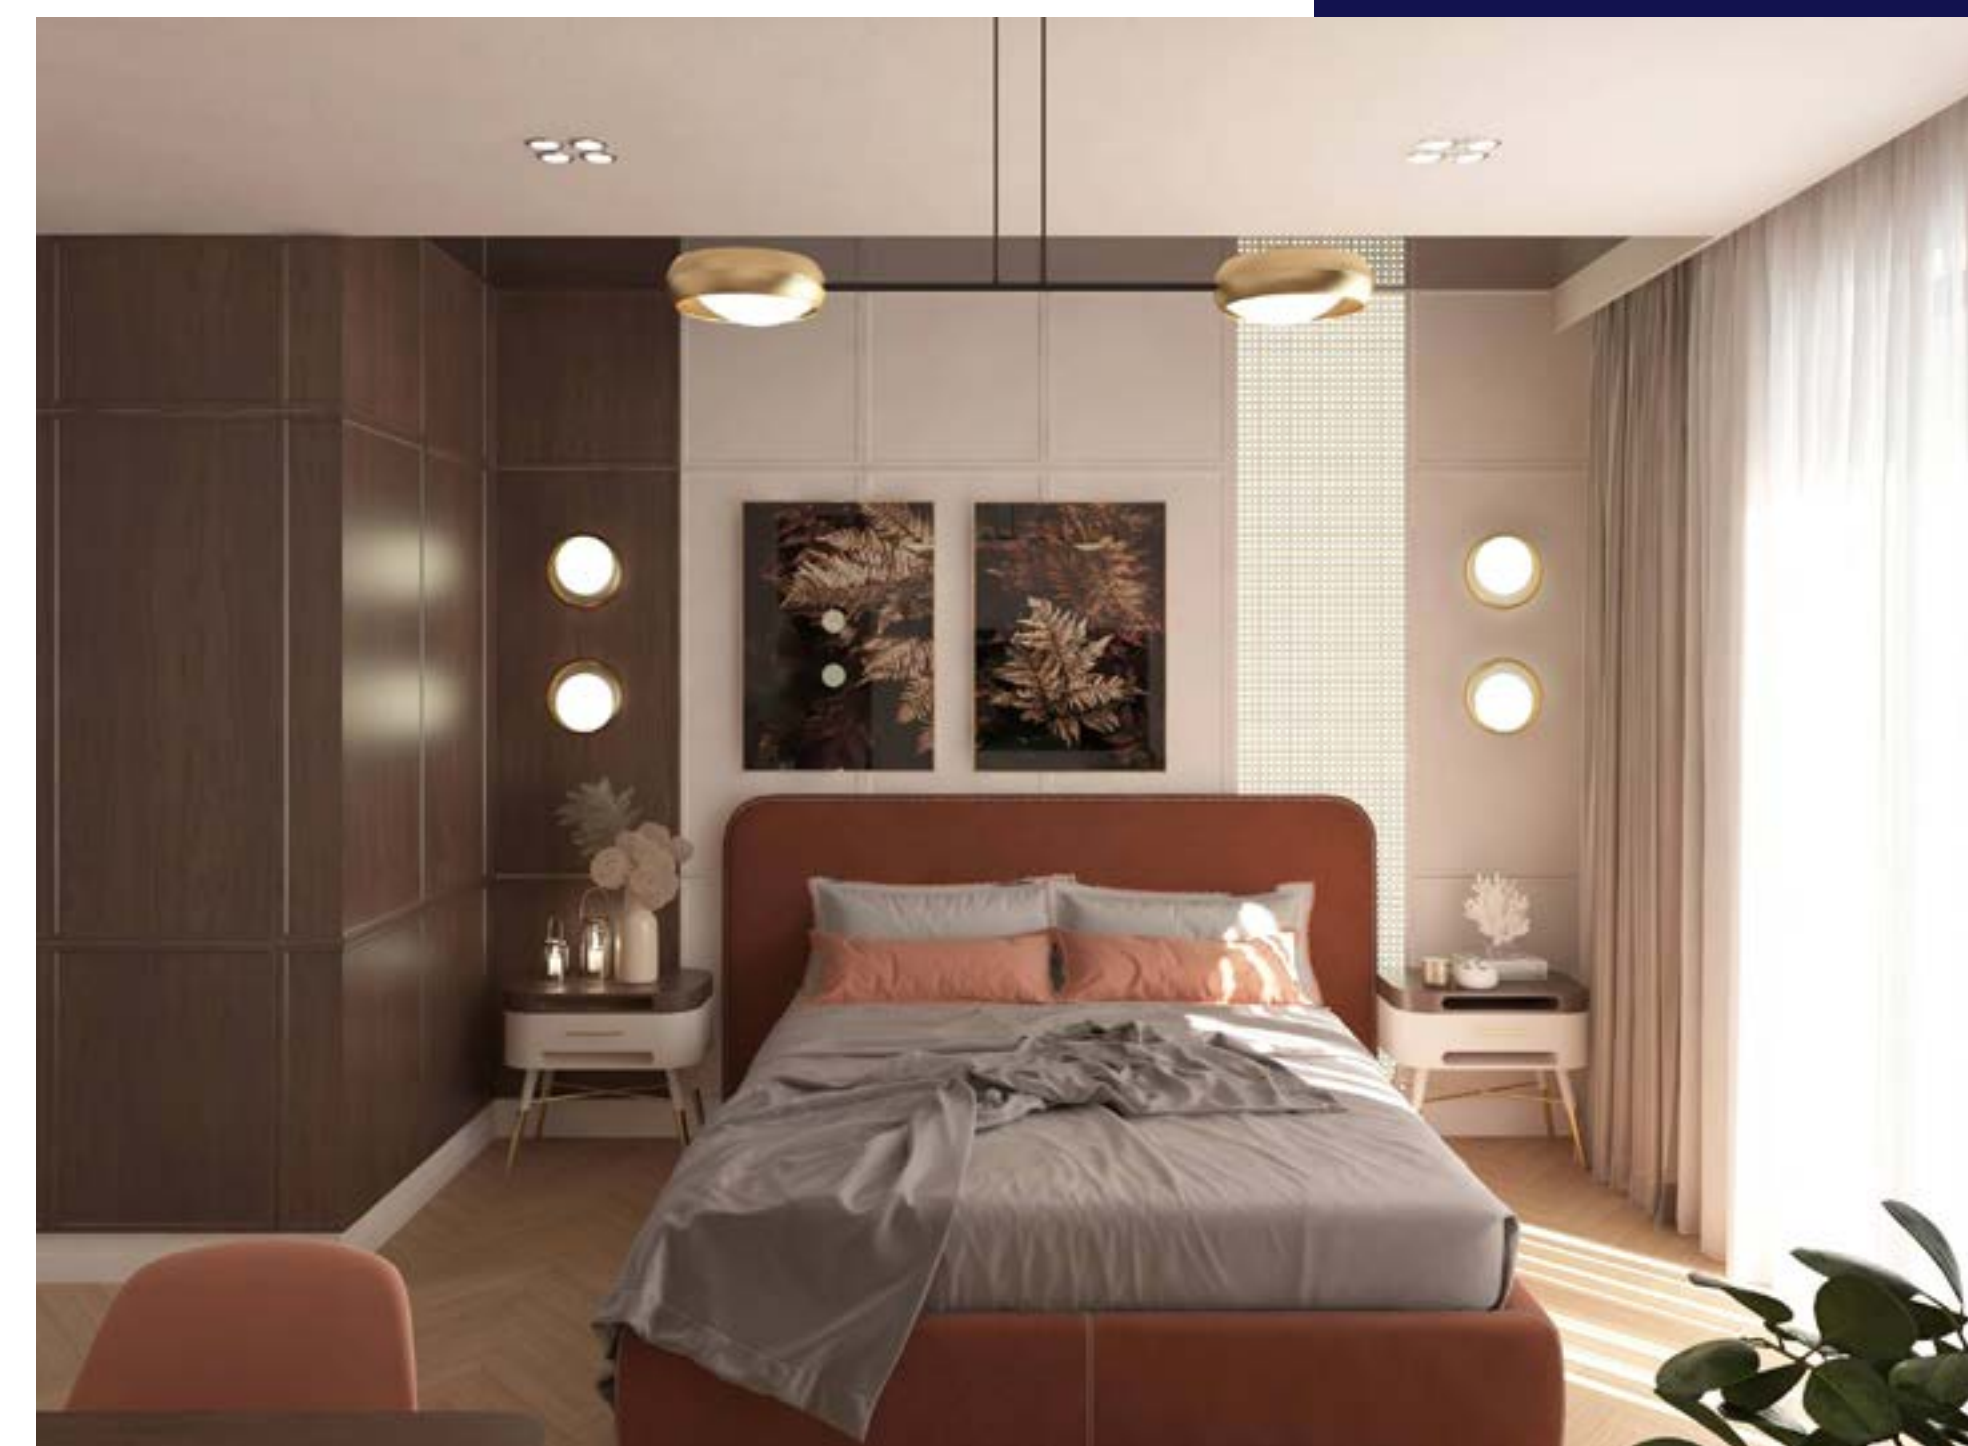

With over 1,478 completed projects, we demonstrate our ability to deliver on time and to the highest standards, earning the trust of real estate developers. Each project is a testament to our commitment to excellence and our focus on building long-lasting relationships, grounded in measurable results and lasting satisfaction.

GRAND ESTATE AUREL VLAICU

A space for those who appreciate subtle elegance and thoughtful comfort. This two-room apartment blends warm autumn tones with dark wood textures, balancing refinement and functionality. Clean lines and ambient lighting create an inviting atmosphere, ideal for modern living. A concept that adds value to any real estate project, transforming each home into a unique experience.

TOGETHER, EVERY STEP OF THE WAY.

1.

Initial documentation – We need the architectural plans of the project to accurately recreate the 3D space.

2.

Ideal client profile – Together, we define the target buyer and the design vision, ensuring each rendering communicates the desired style and functionality.

3.

Fully implementable virtual design – The 3D project uses only commercially available furniture, offering developers realistic and practical solutions. We can also provide quantity lists and budget estimates for furniture upon request.

4.

Feedback and revisions included – Every project includes a free review, allowing developers to optimize the project or offer additional customization to future buyers.

5.

Fast delivery – Delivery time: 2 days per room, ensuring an efficient process without delays.

You'll receive more than just visuals – you'll get actionable solutions! We're with you every step of the way, offering inspiration and support to help future buyers feel at home.
